Message from the Director

Dear Friends and Benefactors,

The first and foremost concern for all our children in the digital era of this present world and in our near future is how they could live happily and appropriately in this age. It is true that computers can do things much speedier than human beings, but they cannot think for themselves. What would help our children to be more ready to live in this era are the formation and training so that they are able to think by themselves, be creative, think differently, be responsible for themselves, be diligent, be honest, be patient and tolerant, and have more self-discipline.

Fr. Michael Weera Phangrak
Director
